OBJECTIVE

Dedicated software developer looking for an opportunity to apply my knowledge with a progressive company where I can provide my expertise and able to assist, create, and innovate as well as provide solutions to everyday problems.

DEVELOPMENT EDUCATION

The Iron Yard, Orlando, FL   Obtain on 11/30/2016
Java Back-End Engineering Course

An immersive 12-week boot camp Back End Engineering with Java and dive into the programming world.

Westside Tech, Winter Garden, FL   Obtain on 06/03/2009
Network Systems Administration Certificate

CompTIA A+ Certified   Obtain on 12/17/2013

TECHNICAL SKILL SET

Programming
- **Languages:** Java, Javascript , Angular
- **Operating Systems:** MS Windows, OS X, Linux
- **Web Technologies:** HTML, CSS, XML, API
- **Java Technologies:** JDBC, J2EE, JPA, Servlets, Spring boot
- **Databases:** MySQL, Cassandra, Postgres, SQL, Hibernate
- **Other:** Apache Tomcat, Apache Kafka, Apache Maven,

DEVELOPMENT PROJECTS

PONGie
PONGie is a ping pong scoreboard application design to log matches and keep count of wins and losses. The server-side architecture was built with Spring Framework to provide a RESTful API that was used to create an iOS app as well.
Tech: Java, PostgresSQL, H2, Heroku, Spring boot

Movie Database
Movie Database was a class weekend project to display Movies using a third-party API and display Now Playing movies!
The server –side architecture was built with Java to provide a RESTful API.
Tech: Java, Html, Spring boot, Swagger API.

Budget
Budget lets you keep track of everyday expenses as well as priorities and calculates if your budget amount is at a desirable amount.
The deployment was to run on local host for a web application.
Tech: Java, JDBC, PostgresSQL, Servlets.

EXPERIENCE

LMS, Orlando, FL   02/13/17-Present
Java Developer
- Develop and create restful applications using spring boot, as well of as persisting data using MySQL databases.
- Collaborated with a team to develop micro services that retrieve psychographic and demographic data for guests of the client
- Work with a team to design and implement an email platform for Carnival Cruises, which involves sending email and scheduling them on specific time frames.
- Help build an in-house tool web application; back end was built using Java (Spring boot) and frontend using Angular.js

AT&T, Orlando, FL   02/3/14-02/3/17
Wire Technician
- Educate customers on U-Verse services, including all program features and functionalities.

Computer Repair, Orlando**,** FL   10/2011-12/2013
- Troubleshooting of complex software issues.
- Acquired knowledge on the fundamentals IP addressing and configuration.

PEMBERTON, INC., Longwood, FL   10/24/2011-01/17/2014
Computer Numerical Control Machinist
- Programmed engineering drawings and all schematics.
- Verified quality, in accordance with statistical processes and control, to ensure proper form, fit and function of product output.
